

I choose to spend \$10.00 a month to receive XM radio. No one forces me to do it. The addition of weather and traffic information is a big help when traveling. the signal is clear and never out of range and I can listen to the music that I want to listen to when I want to.

The use of XM doesn't block the reception of conventional radio and I still listen to local radio stations when I want to.

But now I understand the National Association of Broadcasters wants to control what I listen to and when. Call it what you want- it all boils down to controlling what you can listen to.

I would hope the FCC would reject this NAB Petition 04-160 and allow this new media to grow.
